GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

INTRODUCTION

The management discussion and analysis (“MD&A”) of financial condition and results of operations focuses upon the activities, results of operations, liquidity and capital resources of GT Resources Inc. (the “Company” or “GT Resources”) for the six months June 30, 2026. In order to better understand the MD&A, it should be read in conjunction with the audited financial statements for the year ended December 31, 2025 as well as the consolidated financial statements for the year ended December 31, 2024 and related notes. The Company’s financial statements are prepared in accordance with International Financial Reporting Standards (“IFRS”) and filed with appropriate regulatory authorities in Canada. This MD&A is current to August 18, 2026 and expressed in Canadian dollars unless otherwise stated.

FORWARD LOOKING STATEMENTS

Information set forth in this MD&A may involve forward-looking statements under applicable securities laws. Forward-looking statements are statements that relate to future, not past, events. In this context, forward-looking statements often address expected future business and financial performance, and often contain words such as “anticipate”, “believe”, “plan”, “estimate”, “expect”, and “intend”, statements that an action or event “may”, “might”, “could”, “should”, or “will” be taken or occur, or other similar expressions. All statements, other than statements of historical fact, included herein including, without limitation; statements about the size and timing of future exploration on and the development of the Company’s properties are forward-looking statements. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the Company’s actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following risks: the need for additional financing; operational risks associated with mineral exploration; fluctuations in commodity prices; title matters; environmental liability claims and insurance; reliance on key personnel; the volatility of our common share price and volume and other reports and filings with the applicable stock exchange on which the Company’s common shares are listed and applicable Canadian securities regulations. Forward-looking statements are made based on management’s beliefs, estimates and opinions on the date that statements are made and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by applicable securities laws. There can be no assurance that such statements will prove to be accurate, and future events and actual results could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from our expectations are disclosed in the Company’s documents filed from time to time via SEDAR+ with the Canadian regulatory agencies to whose policies the Company is bound. Investors are cautioned against attributing undue certainty to forward-looking statements.

The users of this information, including but not limited to investors and prospective investors, should read it in conjunction with all other disclosure documents provided including but not limited to all documents filed on SEDAR+ (www.sedarplus.ca).

This MD&A has been prepared in accordance with the requirements of National Instrument 43-101, “Standards of Disclosure for Mineral Projects”, and National Instrument 51-102, “Continuous Disclosure Obligations.”

Qualified Person

Mr. Neil Pettigrew, P.Geo., the Qualified Person as defined by National Instrument 43-101, is the Vice President of Exploration and a director of the Company and has reviewed and approved the technical information in this document.

HISTORIC RESOURCE ESTIMATES

Readers are cautioned that the Company has not attempted to verify historic mineral resource estimates and therefore readers should not place any reliance on any historical estimate. A qualified person has not done sufficient work to classify a historical estimate as a current mineral resource, additionally, a qualified person has not yet determined what work needs to be done to upgrade or verify a historical estimate as a current mineral resources or mineral reserves. The Company is not treating any historical estimates as current mineral resources.

A Historical Resource Estimate on the Main Zone of the Canalask Project is quoted at 400,000 tonnes at 1.35% nickel (copper was not reported) by Discovery Mines Ltd. in 1968 (Yukon Assessment Report 094599). The parameters, methodology and categories used are not known, and thus the reliability of the estimate cannot be determined, however, it is still considered

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

relevant as underground development and diamond drilling in the 1950 & 1960s supported the estimate and provides a guide for future exploration.

A Historical Resource Estimate on the Beaver Pond Zone of the North Rock project is quoted at 1 million tons grading 1.2% copper by Bergman (1973) (Ontario Mineral Deposit Inventory record MDI52C11NE00029). The parameters, methodology and categories used are not known, and thus the reliability of the estimate cannot be determined, however, it is still considered relevant as underground development and diamond drilling in the 1960 & 1970s supported the estimate and provides a guide for future exploration.

A Historical Resource Estimate on the Gouda Lake Zone of the Hemlo East Project is quoted at 167,000 tonnes at 3.5 g/t gold by Placer Dome Canada Ltd. Shevchenko (1995) (Ontario Assessment Report 42C12NE0006). The Historic Resource Estimate is stated to be in the inferred category, however, the parameters and methodology used are not known, and thus the reliability of the estimate cannot be determined, however, it is still considered relevant as diamond drilling in the 1980 & 1990s supported the estimate and provides a guide for future exploration.

A Historical Resource Estimate on the Kuhmo Gold Project in central Finland is quoted as 1,500,000 tonnes grading 0.46% Ni for the Arola nickel deposit and 175,000 tonnes grading 0.66% Ni using a 0.35% Ni cut-off for the Sika-Aho deposit. The parameters and methodology used are not known, thus the reliability of these estimates cannot be determined, however they are still considered relevant as the extensive diamond drilling supporting these estimates provides a guide for future exploration.

OVERVIEW

The Company is a mineral exploration and development company whose common shares are listed on the TSX Venture Exchange ("TSX-V") under the symbol "GT" and is engaged in the exploration of mineral properties. Its assets consist of the Lantinen Koillismaa Project ("LK") PGE-Cu-Ni, located in North-Central Finland; the Tyko I Ni-Cu-PGE, Tyko II Ni-Cu-PGE, and the Canalask Ni Project, located in Yukon, Canada. On May 2, 2023, the Company acquired MetalCorp Limited ("MetalCorp") which owns a 100% interest in the Hemlo East, Big Lake and Playter Projects in Northern Ontario and the North Rock and Black Bear Projects in Northwestern Ontario.

HIGHLIGHTS DURING AND SUBSEQUENT TO THE SIX MONTHS ENDED JUNE 30, 2026

Exploration

- On January 13, 2026, the Company announced the commencement of an extensive assay infill and re-assay program at the Kaukua Zone of its LK Copper – Nickel – Palladium – Platinum project in Finland to support a potential mineral resource update and Preliminary Economic Assessment (PEA).
- On February 17, 2026, the Company announced the acquisition, through staking, of the 12,300-hectare Kuhmo Gold Project in central Finland, expanding its portfolio to include greenstone-hosted gold and nickel exploration targets.
- On May 11, 2026, the Company announced improved nickel grades for the LK Copper – Nickel – Palladium – Platinum project in Finland. This program was undertaken to standardize the analytical techniques used in the Kaukua Deposit and to expand and better define mineralization.
- May 20, 2026, the Company announced it has entered into an earn-in-agreement to acquire the CD Project in the Yukon's Dawson Gold Range, located near Carmacks. The CD Project hosts a Gold – Copper porphyry target, with valid drill permits until 2033.
- On June 18, 2026, the Company announced it has initiated Field Work at CD Gold – Copper Porphyry Project, Yukon.

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

Recent Corporate Developments

On May 13, 2026 the Company announced that it has elected to participate in the Coordinated Blanket Order 51-933 – *Exemptions to Permit Semi-Annual Reporting for Certain Venture Issuers*, issued by the Canadian Securities Administrators. As a result of this election, the Company will file interim financial reports and related MD&A on a semi-annual basis, rather than quarterly. The Company will be exempt from filing interim financial reports and related MD&A for its first and third quarters of the fiscal year. The Company's first quarter it relied on this exemption was for the three-month period ended March 31, 2026.

On May 11, 2026, the Company announced the annual equity incentives comprising 925,000 RSUs, 2,600,000 DSUs, and 3,300,000 stock options granted to directors, officers, employees, advisors, and consultants.

MINERAL PROPERTIES

CD Cu-Au Project ("CD Project"), Yukon

The CD Project is located approximately 70 km west of Carmacks, which is 175 km by paved highway north of Whitehorse, Yukon Territory. The CD Project lies within the Whitehorse Mining District near the Mount Nansen mining camp, within the Dawson Range Gold Belt.

The CD Project exhibits significant geological parallels to Western Copper and Gold's Casino deposit, situated 90km to the northwest. The Casino deposit hosts a Measured and Indicated Resource Estimate of 7.6 billion pounds of copper and 4.8 million oz gold.

The CD Project boasts a well-developed Gold – Copper porphyry target (Maloney target), a secondary untested vein hosted Gold – Silver system is present (Schist target) and a straightforward exploration model with drill ready targets. The project possesses a class III exploration permit for up to 50,000m of drilling good till 2033.

The CD Project consists of 1060 quartz claims covering 21,738 hectares and the Company has the right to earn up to a 75% interest.

On May 19, 2026, the Company entered into a property option agreement with Strategic Metals Ltd. with respect to the CD Property, located in the Yukon, Dawson Gold Range, whereby the Company was granted the right to earn up to a 75% interest in the property. In connection to the agreement, the Company paid Strategic Metals Ltd. a non-refundable exclusivity fee of \$50,000. Pursuant to the agreement, the following are the cash and security considerations to be paid by the Company as well as work commitments to be incurred:

- On or before October 15, 2026 - \$25,000 in cash and \$25,000 in Company shares with work expenditures of \$106,000
- On or before October 15, 2027 - \$50,000 in cash with \$50,000 in Company shares with additional work expenditures of \$1,894,000
- On or before October 15, 2028 - \$50,000 in cash with \$50,000 in Company shares with additional work expenditures of \$2,000,000
- On or before October 15, 2029 - \$50,000 in cash with \$50,000 in Company shares with additional work expenditures of \$2,500,000, and
- On or before October 15, 2030 - \$50,000 in cash with \$50,000 in Company shares with additional work expenditures of \$3,500,000, with the right to earn an additional 15% for a total of 75% with a payment of \$1,000,000 of cash or shares.

Under the provisions of the agreement, if the Company share price is less than \$0.05 at the time of the required Company share issuance, such share issuance shall be satisfied by way of cash payment only.

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

Kuhmo Au Project (“Kuhmo Project”), Finland

Kuhmo Project is located in eastern Finland, located 130 km southeast of the Company’s flagship Lantinen Koillismaa Project. The Project was acquired through staking and consists of one Exploration Reservation covering 2,300 hectares.

The Kuhmo Project has excellent access via several major paved and gravel/dirt roads, a railway line which crosses the project area, and the port city of Oulu is located ~175 km to the west.

The Kuhmo Project represents a belt-scale, early exploration-stage gold project located on the Kuhmo greenstone belt, which forms the central part of a 220 km long and up to 10 km wide north-south trending Archean Tipasjärvi-Kuhmo-Suomussalmi greenstone belt complex. This greenstone belt has many similarities to the prolific greenstone hosted gold in the Abitibi Subprovince of Canada. Furthermore, the belt has been covered with in excess of 22,000 high quality regional till samples, a result of state-run mineral exploration focused on nickel, providing GT with numerous untested gold targets. This is a rare opportunity to accelerate the lead time to discovery in an overlooked greenstone belt.

The Kuhmo Project also hosts a known nickel endowment, including the Arola historical mineral resource of 1.5M tonne grading 0.46% nickel.

Lantinen Koillismaa PGE-Cu-Ni Project (“LK Project”), Finland

The LK Project is located in North-Central Finland approximately 60 km north of the village of Taivalkoski. The Property is situated about 130 km southeast of the town of Rovaniemi and 160 km northeast of the port city of Oulu and is accessed by major paved roads and local access on gravel or dirt roads.

The elements palladium, platinum, gold, copper, cobalt, and nickel are known to be present and have been analysed in drilling and surface sampling in the Property. The deposit type is an open pit style, with disseminated sulphide mineralization along the prospective basal unit of the Koillismaa Complex, with similarities to Platreef type deposits of the Bushveld Igneous Complex. The Koillismaa Complex forms part of the 2.5-2.4 Ga Tornio-Näränkävää Layered Intrusion Belt that runs roughly east – west across Finland and into neighbouring Russia. The Koillismaa Complex is part of a suite of Paleoproterozoic continental rift-related intrusions which are highly prospective for PGE-Cu-Ni sulphide deposits.

The LK Project area is currently covered by 9 Exploration Permits totalling 2,484 hectares, with an additional six Exploration Permit Applications covering 21,409 hectares. Exploration Permits are divided into two groups; the Kaukua Group consisting of the Kaukua and Murtolampi targets and the Haukiahö Group covering the Lipeävaara and Haukiahö targets. An Exploration Permit is granted for a fixed term of up to 4 years and can be renewed for up to 3 years at time for a total maximum duration of 15 years, excluding renewal review periods, and includes preceding comparable permits, which are referred to as Claims in the old Mining Act (pre-2011).

In Q1 2022, the Company finalized the LK project Phase II metallurgical testing program and announced an interim updated Mineral Resource Estimate for the LK Project on April 25, 2023. The Indicated and Inferred Mineral Resource Estimate (“MRE”) was prepared by the Company under the supervision of SLR Consulting (Canada) Ltd. (formerly Roscoe, Postle Associates Inc.) and is disclosed in accordance with National Instrument 43-101 (“NI43-101”) for the 100%-owned Lantinen Koillismaa (“LK”) Project in north-central Finland.

The below tables summarize the updated Mineral Resource Estimate (Table 1a) and the Mineral Resource Estimate in-situ contained metal (Table 1b):

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

Table 1a – LK Project Mineral Resource Estimate – April 2022

MINERAL RESOURCE ESTIMATE - April 2022									
Tonnes & Grade - US\$1,700 Pd per oz									
	Strip Ratio	Tonnes (Mt)	Pd (g/t)	Pt (g/t)	Au (g/t)	TPM (g/t)	Cu (%)	Ni (%)	Co (g/t)
Indicated									
Kaukua Area	1.50	38.2	0.61	0.22	0.07	0.89	0.13	0.11	64.56
Inferred									
Kaukua Area +Murtolampi	1.45	30.8	0.52	0.20	0.08	0.80	0.14	0.14	86.07
Haukiaho	0.58	18.9	0.27	0.11	0.10	0.48	0.18	0.14	54.30
Total Inf.	1.26	49.7	0.43	0.17	0.09	0.68	0.16	0.14	73.98

Table 1b – LK Project In-situ contained metal – April 2022

MINERAL RESOURCE ESTIMATE - April 2022								
Contained Metal - US\$1,700 Pd per oz								
	Strip Ratio	Pd (M oz)	Pt (M oz)	Au (M oz)	TPM (M oz)	Cu (M lbs)	Ni (M lbs)	Co (M lbs)
Indicated								
Kaukua Area	1.50	0.74	0.26	0.08	1.09	110.7	91.6	5.4
Inferred								
Kaukua Area +Murtolampi	1.45	0.52	0.20	0.07	0.79	96.5	93.9	5.8
Haukiaho	0.58	0.16	0.07	0.06	0.29	76.4	57.5	2.3
Total Inf.	1.26	0.68	0.26	0.14	1.08	172.9	151.5	8.1

Notes to table:

- CIM (2014) definitions were followed for Mineral Resources.
- The Mineral Resources have been reported above a preliminary open pit constraining surface using a Net Smelter Return (NSR) pit discard cut-off of US\$12.5/t (which for comparison purposes equates to an approximately 0.65 g/t Palladium Equivalent in-situ cut-off, based on metal prices)
- The NSR used for reporting is based on the following:
 - Long term metal prices of US\$ 1,700/oz Pd, US\$ 1,100/oz Pt, US\$ 1,800/oz Au, US\$ 4.25/lb Cu, US\$ 8.50/lb Ni and US\$ 25/lb Co.
 - Variable metallurgical recoveries for each metal were used at Kaukua and Murtolampi and fixed recoveries of 79.8% Pd, 80.1% Pt, 65% Au, 89% Cu, 64% Ni and 0% Co at Haukiaho.
 - Commercial terms for a Cu and Ni concentrate based on indicative quotations from smelters.
- Total Precious Metals (TPM) equals palladium plus platinum plus gold
- Bulk densities range between 1.8 and 3.23 t/m3.
- Numbers may not add up due to rounding.
- Mineral Resources, which are not Mineral Reserves, do not have demonstrated economic viability. The estimate of mineral resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

- The quantity and grade of reported inferred resources in this estimation are conceptual in nature and there has been insufficient exploration to define these inferred resources as an indicated or measured mineral resource and it is uncertain if further exploration will result in upgrading them to an indicated or measured mineral resource category.

Kostonjarvi, Cu-Ni-PGE Project (“KS Project”), Finland

In April 2025 the Company relinquished the KS Exploration Permit Application.

Tyko I Ni-Cu-PGE Property (“Tyko I Project”), Canada

The Tyko I Property is a nickel (Ni), copper (Cu), platinum-group element (PGE) project comprises of 465 mining claims, registered to Tyko Resources Inc. (a wholly owned subsidiary of the Company) and covers approximately 30,308 hectares including claims under option from First Class Metals and a private prospector. The mining claims are located in the Bigrock Lake and Olga Lake areas, and the townships of McGill and Shabotik, Thunder Bay Mining Division, Ontario, Canada (NTS 42C/13NW and 14NE). There are six significant Ni-Cu-PGE showings or zones occur on the Tyko Project; West Pickle, Smoke Lake, RJ, Tyko, Bulldozer and Shabotik zones.

The mineralization at Tyko is nickel-rich with an average Ni:Cu ratio of ~2:1 and a Pt:Pd ratio of ~1:1. The overall sulphide tenors of the Ni-Cu-PGE mineralization are very high. Total sulphur analysis completed by the Company indicated metal tenors in 100% sulphide that average 8.6% Ni, 4.6% Cu, and 3.3g/t PGE (Pt+Pd+Au) at the RJ Zone and 16.3% Ni, 8.70% Cu, and 12.8g/t PGE at the Tyko Zone.

The 2022 drill program at Tyko resulted in the discovery of the high-grade West Pickle and Ember Zones. West Pickle has returned results up to 10.4% Ni 3.4% Cu and 0.92 g/t Total Precious Metal (“TPM”) over 2.3 meters in hole TK-22-070. West Pickle is very similar to the high-grade Smoke Lake Zone, located 20km to east discovered in late 2020, which has returned 8.2% Ni, 2.9 % Cu, 0.1 % Co, 0.6 g/t Pd, 0.5 g/t Pt in hole TK-20-023 over 3.8 meters at surface. The Tyko project hosts two high-grade massive sulphide zones, and four other blebby to locally net textured nickel-copper showings (Ember, RJ, Tyko and Shabotik) all with very similar metal ratios and styles of mineralization.

The Tyko Project is believed to represent a new nickel camp with West Pickle and Smoke Lake 20 kilometers apart. An interpreted chonolith system preserved within the Black Pic Tonalite batholith has been identified which fed these numerous nickel-copper zones. Due to the a-typical geological setting this area has seen little to no previous exploration and has never even been mapped by the Ontario Geological Survey, as a result the Company has experienced significant exploration success and believes that there are several new zones yet to be found.

Tyko II Ni-Cu-PGE Property (“Tyko II Project”), Canada

On September 11, 2023, the Company announced the acquisition of the Tyko II Property, which was acquired through a combination of staking and mineral claim purchases and came with de-risked drill targets given the Company had already conducted VTEM and soil sampling surveys.

The Tyko II Property is a nickel (Ni), copper (Cu), platinum-group element (PGE) project and is comprised of 354 mining claims, registered to Tyko Resources Inc., covers approximately 8,621 hectares and has a long history of exploration dating back to the 1950’s when the nearby world class Geco copper-lead-zinc mine was discovered; sporadic exploration has been conducted by various operators on the Tyko II Property since that time.

The Tyko II Property is located approximately 10 kilometers north of the main Tyko I Property and roughly 15 km east-southeast of the town of Manitouwadge, ON. The claim block encompasses magnetic anomalies associated with the Faries-Moshkinabi Mafic-Ultramafic Complex. The property is accessible via a network of all season logging roads.

Canalask Ni-Cu-PGE Property (“Canalask Project”), Canada

The Canalask Property is located within the Whitehorse Mining District, approximately 300 kilometers northwest of Whitehorse, Yukon and is accessible from the Alaska Highway near Beaver Creek. The Canalask Property consists of a contiguous block of 195 quartz claims covering an approximate area of 3,448 hectares.

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

The project includes a footwall deposit with a historic resource estimate of 400,000 tonnes grading 1.3% nickel, the occurrence of the footwall deposit remains unexplained, and it's the hypothesis of the Company that is has been fed by a large massive-sulphide deposit at depth within the adjacent ultramafic intrusion. Drilling by Falconbridge in 2008 intersected disseminated locally net textured nickel-copper sulphide in an embayment structure within the ultramafic dyke proximal to the footwall deposit, however only shallow drilling was completed before Falconbridge was acquired by Xstrata and they subsequently dropped the project. The Company plans to drill deeper and conduct downhole EM surveys to explore for massive nickel-copper sulphide mineralization.

The Canalask Property covers the lateral extent of the northwest – southeast striking, steeply dipping “White River Intrusive Complex” (WRIC), which is part of the larger Kluane Mafic-Ultramafic Belt. The belt is host to numerous nickel-copper +/- platinum-palladium deposits and prospects, most notably the past producing Wellgreen Deposit, now held by Nickel Creek Platinum Corp., approximately 110 kilometers to the south.

In July 2026 the Company received a Class III exploration permit valid for 10 years. This permit will allow more flexible and cost-effective access for future drill programs.

North Rock Cu-Ni-PGE Property (“North Rock Project”), Canada

In the fall of 2024, the Company launched a BoreHole ElectroMagnetic (“BHEM”) survey on the North Rock Cu-Ni-PGE project. This program surveyed the deepest hole on the project and returned in hole and off hole conductors suggesting additional Cu-Pd rich “footwall style” massive sulphide mineralization exists on the project. Plans are underway for additional BHEM surveys of more historic holes, followed by drill testing.

Other

The Company entered into an Option Agreement with Nortec Minerals Ltd. (“Nortec”), the holder of mineral claims for the Sturgeon Lake VMS Property in Ontario, whereby Nortec granted the Company an exclusive option to acquire a 51% interest in the property. As part of this agreement, the Company paid Nortec \$200,000 in the year ended December 31, 2024, for exploration work. The option period lasts three years, during which the Company must meet specific conditions, including incurring qualified expenditures, to exercise the option.

EXPLORATION PERMITTING

Tyko I & Tyko II Projects and the Hemlo East and Big Lake Projects

As of the date of this MD&A, the Company is still experiencing permitting delays on the Tyko I, Tyko II Hemlo East and Big Lake Projects, with such permitting delays preventing the Company from advancing drilling work on these projects.

Exploration and evaluation expenditures

GT Resources is an exploration stage company and engages principally in the exploration of resource properties. The Company expenses all direct and indirect costs pertaining to exploration and evaluation of mineral properties in the period in which they are incurred. These direct exploration and evaluation expenditures include such costs as acquisition costs, materials used, surveying costs, drilling costs and payments made to contractors.

During the six months ended June 30, 2026 and 2025, the Company incurred the following exploration and evaluation expenditures on its properties:

GT Resources Inc.

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

REVIEW OF FINANCIAL AND OPERATIONS RESULTS

Six months ended June 31, 2026 and 2025

During the six months ended June 30, 2026, the Company had a net loss of \$1,548,075 (six months ended June 30, 2025 - \$825,246), an increased net loss of \$722,829 when compared to the same period in 2025. The primary contributors were the following:

- Exploration and evaluation expense in the six months ended June 30, 2026 increased by \$452,178 when compared to the same period in the previous year primarily due to higher exploration spending on projects in the six months ended June 30, 2026.
- Management and consulting expense increased by \$65,471 in the six months ended June 30, 2026 when compared to the same period in the previous year, primary due to the geologists working on corporate projects in the period. Professional fees increased by \$26,504 in the six months ended June 30, 2026 when compared to the same period in the previous year primarily due to legal and audit expenses increasing in the six months ended June 30, 2026.
- Corporate development increased by \$65,185 in the six months ended June 30, 2026 when compared to the same period in the previous year primarily due to consulting related to corporate development that occurred in the six months ended June 30, 2026.

The above factors were partially offset by the following:

- Share-based compensation decreased by \$55,925 in the six months ended June 30, 2026 when compared to the same period in the previous year primarily due to the RSUs and Options vesting and a lower expense recorded related to DSUs granted during the six months ended June 30, 2026.
- Government grants decreased by \$49,358 in the six months ended June 30, 2026 when compared to the same period in the previous year, the company did not have government income for 2026.
- Interest income decreased by \$58,547 in the six months ended June 30, 2026 when compared to the same period in the previous year due to the decrease in cash balance that the Company held and a decrease in interest rate.

LIQUIDITY, CAPITAL RESOURCES AND GOING CONCERN

At present, the Company's operations do not generate cash inflows and its financial success is dependent on management's ability to fund its exploration and evaluation programs and discover economically viable mineral deposits. The mineral exploration process can take many years and is subject to risk factors that are beyond the Company's control.

In order to finance the Company's future exploration programs and to cover administrative and overhead expenses, the Company may raise money through the sale of equity instruments. Many factors influence the Company's ability to raise funds, including the health of the resource market, the climate for mineral exploration investment, the Company's track record, and the experience and calibre of its management. Actual funding requirements may vary from those planned due to a number of factors, including the progress of exploration activities. Management believes it will be able to raise equity capital as required in the long term but recognizes there will be risks involved that may be beyond their control.

The business of exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of exploration properties and the Company's continued existence are dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis.

Management has applied judgement in the assessment of the Company continuing as a going concern by taking into account all available information. Management estimates that the going concern assumption is appropriate for at least the next twelve months following the reporting date of these statements.

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

As at June 30, 2026, the Company had working capital of \$6,054,675, a decrease from the balance at December 31, 2025 of \$7,510,975 primarily due to a lower cash balance at June 30, 2026 compared to June 30, 2025.

During the six months ended June 30, 2026, cash used in operating activities was \$1,423,716 which was more than the cash used in operating activities during the same period of 2025 (six months ended June 30, 2025 - \$817,532) due primarily to higher exploration expenditures in 2026. Operating activities is primarily comprised of cash used for exploration and evaluation activities, as well as management and consulting expense, offset by interest income.

During the six months ended June 30, 2026 and 2025, cash provided by financing activities was \$Nil, as no financing activities occurred in those periods.

During the six months ended June 30, 2026 and 2025, cash provided by investing activities was \$Nil, as no financing activities occurred in those periods.

Shareholder's Equity

The authorized capital stock of the Company consists of an unlimited number of common shares with no par value. As at June 30, 2026, the Company had 389,167,726 (December 31, 2025 – 388,942,726) common shares issued and outstanding. On May 2, 2026, the Company issued 225,000 shares in relation to the vesting of restricted share units ("RSUs").

RECENT DEVELOPMENTS AND OUTLOOK

The Company expects to obtain financing in the future primarily through further equity financing. There can be no assurance that the Company will succeed in obtaining additional financing, now or in the future. Failure to raise additional financing on a timely basis could cause the Company to suspend its operation and eventually to forfeit or sell its interest in its exploration and evaluation assets.

COMMITMENTS

The Company currently has no commitments.

OFF BALANCE SHEET ARRANGEMENTS

The Company does not have off balance sheet arrangements.

CHANGES IN ACCOUNTING POLICIES INCLUDING INITIAL ADOPTION

New accounting standards and interpretations

The International Accounting Standards Board continually issues new and amended standards and interpretations which may need to be adopted by the Company. The Company continually assesses the impact that the new and amended standards and interpretations may have on its financial statements or whether to early adopt any of the new requirements.

Certain pronouncements were issued by the IASB that are mandatory for accounting periods commencing on or after January 1, 2026. Many are not applicable or do not have a significant impact to the Company and have been excluded.

New accounting standards issued but not yet adopted

IFRS 18 – Presentation and disclosure in the financial statements was issued in April 2024 to provide requirements for the presentation and disclosure of information in general purpose financial statements (financial statements) to help ensure a company provide relevant information that faithfully represents an entity's assets, liabilities, equity, income and expenses. The standard is effective for annual periods beginning on or after January 1, 2027 and has not yet been adopted by the Company and is being evaluated to determine the impact.

Management Discussion and Analysis

For the six months ended June 30, 2026

FINANCIAL INSTRUMENTS

The fair values of financial assets and financial liabilities carried at amortized cost approximate their carrying amounts due to the short-term maturity of the instruments. As at June 30, 2026, the Company held cash, sales tax recoverable and accounts payable and accrued liabilities at amortized cost.

Financial instruments measured at fair value are classified in accordance with an established hierarchy that prioritizes the inputs in valuation techniques used to measure fair value, as follows:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, and
- Level 3 – Inputs that are not based on observable market data

As at June 30, 2026, the Company held marketable securities which are measured at fair value and are based on Level 1 inputs of the fair value hierarchy.

The Company is exposed to a varying degree of risks related to financial instruments. Management actively monitors and manages these risks. How management mitigates these risks are discussed below:

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Financial instruments that potentially subject the Company to credit risk consist of cash, marketable securities and sales tax recoverable. The Company's cash balance was \$6,080,791 as at June 30, 2026 (December 31, 2025 - \$7,504,507) and is held through large financial institutions in Canada and Finland. The fair value of the Company's marketable securities was \$23,327 as at June 30, 2026 (December 31, 2025 - \$21,785), and consists of equity instruments in a publicly traded junior mining company. At June 30, 2026, the Company's sales tax receivables are due from the Governments of Canada and Finland of \$39,299. (December 31, 2025 - \$15,451). The carrying value of the Company's financial assets recorded in the financial statements represents the Company's maximum exposure to credit risk. Management believes the risk of loss to be not significant.

Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds and meeting obligations associated with financial liabilities. The Company manages liquidity risk through the management of its capital structure. As at June 30, 2026, the Company had working capital of \$6,054,675, (December 31, 2025 - \$7,510,975). However, the Company has an accumulated deficit of \$46,229,457 (December 31, 2025 - \$44,681,382). The continuation of the Company depends upon the support of its equity investors, which cannot be assured.

Other Market Price Risk

The Company is exposed to price risk with respect to equity and commodity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on profit or loss and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of copper, nickel, palladium and platinum, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company. A 10% increase or decrease in the price of marketable securities held by the Company would increase or decrease net loss by \$2,332 (December 31, 2025 - \$2,179).

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

Currency risk

The Company has transactions internationally and is exposed to foreign exchange risk from the Euro currency. Foreign exchange risk arises from financing and purchase transactions that are denominated in currency other than the Canadian Dollar, which is the functional currency of the Company. As at June 30, 2026, the Company held in Euros the Canadian dollar equivalent of \$24,655 (December 31, 2025 - \$38,779) in cash, \$39,734 in reclamation deposits (December 31, 2025 - \$39,418), \$15,435 in sales tax recoverable (December 31, 2025 - \$8,360), and \$Nil in accounts payable and accrued liabilities (December 31, 2025 - \$18,266). A 10% increase or decrease in the Euro would increase or decrease net loss by \$8,000 (December 31, 2025 - \$6,800).

Interest risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to interest rate risk with respect to its cash flow. The Company earns interest based on market interest rates from the cash and cash equivalents it holds through Canadian financial institutions. The interest earned by the Company will fluctuate based on changes in market interest rates.

RELATED PARTY TRANSACTIONS

Key management compensation

Key management consists of the Company's directors and officers. In addition to management and consulting fees paid to these individuals, or companies controlled by these individuals, the Company provides stock options, RSUs and DSUs. Remuneration of key management includes the following:

	Six months ended June 30, 2026	Six months ended June 30, 2025
Management and consulting ⁽¹⁾	\$ 264,200	\$ 258,500
Share based compensation ⁽²⁾	54,508	96,270
Total remuneration	\$ 318,708	\$ 354,770

(1) Director, executive and officer compensation

(2) Represents the fair-value of stock options, RSUs and DSUs granted to directors and officers.

Related party transactions and balances not disclosed elsewhere

As at June 30, 2026, the Company owed \$Nil (December 31, 2025 - \$2,000) and during the six months ended June 30, 2026, the Company has paid and \$Nil (six months ended June 30, 2025 - \$38,307) and accrued \$Nil (six months ended June 30, 2025 - \$12,350) to Fladgate Exploration Consulting Corp, a corporation which is related to the Vice President - Exploration, which was related to exploration and evaluation expenses and for project management services. The amount owing was included in accounts payable and accrued liabilities and is unsecured, non-interest bearing and is expected to be repaid under normal trade terms.

As at June 30, 2026, the Company owed \$Nil (December 31, 2025 - \$Nil), has \$20,000 (December 31, 2025 - \$20,000) in prepaid expenses and during the six months ended June 30, 2026 has paid or accrued \$Nil (six months ended December 31, 2025- \$Nil) to Weyrauch & Associates Inc., a corporation related to the CEO, for equipment rental related to exploration and evaluation activities. The amount owing was included in accounts payable and accrued liabilities and is unsecured, non-interest bearing and is expected to be repaid under normal trade terms.

GT Resources Inc.

Management Discussion and Analysis

For the six months ended June 30, 2026

As at June 30, 2026, the Company owed \$Nil (December 31, 2025 - \$Nil), has \$9,000 (December 31, 2025 - \$9,000) in prepaid expenses, has paid or accrued \$18,000 (six months ended June 30, 2025 - \$18,000) to a person related to the CEO for costs related to office rental in Toronto.

As at June 30, 2026, the Company owed officers of the Company \$Nil (December 31, 2025 - \$13,548) for various expenses, including but not limited to exploration & evaluation expenses, marketing and travel costs and accrued payroll. The amount owing was included in accounts payable and accrued liabilities and is unsecured, non-interest bearing and is expected to be repaid under normal trade terms.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's accounting policies are described in Note 3 to the consolidated financial statements for the year ended December 31, 2025 and 2024. The preparation of financial statements in accordance with IFRS Accounting Standards requires management to select accounting policies and make estimates. Such estimates may have a significant impact on the financial statements. Actual amounts could differ materially from the estimates used and, accordingly, affect the results of the operations.

Areas where estimates were used for six months ended June 30, 2026 include the valuation of share-based payments and income taxes. For share-based payments, the Company measures the cost of options granted for goods and services with reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them.

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

PROPOSED TRANSACTIONS

There are no proposed transactions that should be disclosed.

SUBSEQUENT EVENTS

There are no subsequent events that should be disclosed.

RISK FACTORS

See the risk factors disclosed in the Company's Annual Information Form for the year ended December 31, 2025 and filed on April 2, 2026 for a detailed discussion on the Company's risk factors.
